HALAMAN LOGIN

1. Buat Project terlebih dahulu
2. Lakukan pengaturan pada materi sebelumnya
3. Buat login.jsx
4. Buat pengaturan React Router DOM pada App.jsx

app.jsx

```
1 import { BrowserRouter, Route, Routes } from "react-router-dom";
2 import "../App.css";
3 import Login from "../pages/login";
4 import Dashboard from "../pages/dashboard";
5
6 const App = () => {
7   return (
8     <BrowserRouter>
9       <Routes>
10        <Route path="/" element={<Login />} />
11        <Route path="/dashboard" element={<Dashboard />} />
12      </Routes>
13    </BrowserRouter>
14  );
15 };
16
17 export default App;
```

5. Buat Login bebas, dokumentasi dapat dilihat pada Chakra UI

login.jsx

```
1  import {
2    Box,
3    Button,
4    Card,
5    CardBody,
6    CardHeader,
7    CardRoot,
8    CardTitle,
9    Center,
10   Image,
11   Input,
12   Text,
13 } from "@chakra-ui/react";
14
15 import logo from "../assets/icons/logo.png";
16
17 const Login = () => {
18   return (
19     <>
20       <Box
21         backgroundColor="teal"
22         width="100dvw"
23         height="100dvh"
24         display="flex"
25         flexDirection="row"
26         justifyContent="center"
27         alignItems="center"
28       >
29         <CardRoot borderRadius="20px" backgroundColor="white" color="black">
30           <CardHeader>
31             <CardTitle>
32               <Center>
33                 <Image src={logo} width="100px" />
34               </Center>
35               <Text textAlign="center">My Inventory</Text>
36             </CardTitle>
37             <CardBody gapY="10px">
38               <Input placeholder="Username" type="text" />
39               <Input placeholder="Password" type="password" />
40               <Button backgroundColor="teal" color="white" borderRadius="10px">
41                 <Text>LOGIN</Text>
42               </Button>
43             </CardBody>
44           </CardHeader>
45         </CardRoot>
46       </Box>
47     </>
48   );
49 };
50
51 export default Login;
```
